Configuration of Ubuntu for Notation Software Products with Wine

1. Configure Repository of Wine, Installation of Wine

Wine is not part of the standard distribution of Ubuntu but Ubuntu provides a stable package which needs to be installed separately. Below find the commands to do so.

```
$ sudo dpkg --add-architecture i386
$ sudo apt-get install wine32:i386
$ sudo apt-get install wine
$ winecfg
```

2. Configure Wine

\$ winecfg

Select Windows 10

Wine	Vine Windows-Programmstarter								
Q	Wine-Konfiguration								
	Laufwerke Audio Über								
	Anwendungen Bibliotheken Grafik Desktop-Integration								
	Anwendungseinstellungen								
	Wine kann für jede Anwendung eine unterschiedliche Windows-Version nachahmen. Dieser Reiter ist mit den Reitern								
	'Bibliotheken' und 'Grafik' verknüpft, so dass Sie entweder systemweite oder anwendungsabhängige Einstellungen in diesen Reitern vornehmen können.								
	Standardeinstellungen

	Windows-Version: Windows 10								
	OK Abbrechen Anwenden								

3. Installation of notation composer 5

Download Notation Software with your most favourite browser like Firefox. Typically the browser saves the downloaded file in the Downloads folder of the user.

Start the Terminal

Start the Wine App installer

\$ wine uninstaller

	Add/Remove Programs	-	
Applicatio	ns		
	To install a new program from a floppy disk, CD-ROM drive, or your hard drive, click Install.

The installation of notation musician 5 and notation player 5 are similar.

IMPORTANT - when installing Composer / Musician

Due to a bug in Wine please do NOT change the default program installation folder.

notation composer 3		
Select Installation Folder		
	notati	ion software
The installer will install notation compo	ser 3 to the following folder.	
To install in this folder, click "Next". To) install to a different folder, enter it be	low or click "Browse".
Eolder: C:\Program Files (x86)\Notation_3 Please do NOT change folder for the program	e this installation	Browse Disk Cost
	Cancel < Back	Next >

We have reported this bug to the Wine community and will remove this installation advice when the Wine correction will be available.

If during installation a Repair/Remove window may pop up e.g. for de-installing a former version or a trial version, please always use Remove, never use Repair

notation composer 3
Welcome to the notation composer 3 Setup Wizard
notation software
Select whether you want to repair or remove notation composer 3.
 Repair notation composer 3 Remove notation composer 3
Always remove, never repair
Cancel < Back Finish

4. How to start Composer, Musician or Player after installation

During installation a desktop icon is created. The desktop icon must be available for launching the app. Right-click to the desktop icon and Allow Launching.

Open	
Open With Other Application	
Cut	
Сору	
Rename	
Move to Trash	
Allow Launching	
Send to	
Compress 1 file	
New Folder with 1 item	
Properties	

5. Save an external backup of the software

During installation of the software an automatic backup is created into to a zip folder. This zip folder is located in the Downloads folder resp. the folder where the installation was started. In addition you can find the backup in the product's installation folder (see Appendix 1).

Please save this zip backup on an external device in case a re-installation needs to be made.

For a re-installation please start with step 3. of this installation guide.

Appendix:

Useful information about the use of Notation Software on Ubuntu

A1. Uninstalling of Notation Software

Run the terminal command

\$ wine uninstaller

A2. File structure on Ubuntu

Wine creates the following directory structure. To toggle to the hidden folders like .wine press Crtl ${\rm H}$

The z: drive points to the user's home directory.

A3. Setting your default song directory

In order to set your default song directory please perform the following steps.

									1	notatior	n comp	oser 3 - [Opi

A5. PDF files from Notation Software

Notation Software offers a build-in PDF Export feature. However, you may want to use a public PDF saving feature which can be used through the printing dialog window. For that on Ubuntu we recommend cups-pdf. Ubuntu does not come with a pre-installed PDF printer thus you have to set it up yourself.

Install cups-pdf through the terminal with the command

\$ sudo apt-get install cups-pdf

The cups-pdf printer will show up in the print dialog. The PDF file will be saved in the PDF folder.

A6. Saving songs to an external drive

External drives on Ubuntu are mounted at /media

E.g. an external drive with the name "External Drive" is mounted on

/media/[username]/External Drive

For saving a songs to an external drive please navigate to the external drive as shown in the images below
